

Self-Employed and Farming Income

Persons who are self-employed or engaged in farming may experience variations in cash flow or monthly income throughout the year. These persons may use their income tax records from the preceding calendar year as a basis for applying for the free and reduced price meals. The income to be reported is income derived from the business venture less operating costs incurred in the generation of that income. Deductions for personal expenses such as medical expenses and other non-business deductions are not allowed in reducing gross business income.

If you have additional income from other kinds of employment, this income must be treated as separate and apart from the income generated from your business venture. USDA **DOES NOT** recognize income the same way as IRS. USDA does not permit a loss from a business venture to off-set earnings from wages or salary. Though your business may have suffered a net operational loss, for purposes of this application, it is not possible to have a negative income. The least self-employed income possible is zero (no income). For example, if you operated a business at a net loss but held another job where you received wages, your income for purposes of applying for free or reduced price meals would be the income from your wages only. The loss from the business cannot be deducted from the amount of the income earned in the other job.

A prior year loss from farming or other self-employment cannot be used to reduce the current year net income for determining free and reduced price eligibility. Wages paid to a spouse or other family member in the operation of a farm or private business must be shown as household income in Part 2 of the application.

The least income possible is zero (no income).

Income from private business operations is to be taken from your most recent U.S. Individual Income Tax Return - Form 1040. Use the lines from the 1040 that are identified.
